

Louisiana Exotic Animal Resource Network

-has animals in need of great homes!

We currently have marked for adoption-

- Bearded Dragons
- Leopard Geckos
- Ferrets
- Ball pythons
- And more!

We do not charge adoption fees, but we do interview potential adoption homes to make sure the animals will be well cared for.

To be considered as an adoption or foster placement for exotic animals, please send an email or text to the contacts below to request an application. We will want to know what types of animals you would like to be a resource for, and if you have experience with that species. We will also need to know if you have an enclosure (we can help you set one up). Preference is given to people who have a vet who can verify that you keep your animals up to date on their exams.

L.E.A.R.N. is a Louisiana non-profit organization that freely provides rescue and licensed rehabilitation services to exotic and indigenous animals, as well as conservation education to the public. We also provide long-term sanctuary for special needs animals. Our primary focus is on assisting reptiles, amphibians and invertebrates. We are headquartered in Greenwood, Louisiana.
